***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Daruwalla (US 6,693,878)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 6, Daruwalla teaches receiving a data packet having a SID (col. 9 lines 65-67).

Art Unit: 2666

Daruwalla teaches using the SID to obtain a service flow assigned to the data packet (VPN traffic flows separated based on the SID tag, col. 9 lines 65-67).

Daruwalla teaches determining an appropriate MPLS tag for the data packet based on the service flow (col. 8 lines 9-14).

Daruwalla teaches tagging the data packet with the MPLS tag before transmitting the data packet to an external entity (places appropriate "tag" on each packet so that the packet traverses the correct VPN, col. 9 lines 65-67).

Regarding claim 10, a CMTS comprising stored program instructions for performing the method of claim 6 (CMTS, col. 9 lines 65-67).

#### ***Allowable Subject Matter***

3. Claims 1-5, 7-9, and 11 are allowed.

#### ***Conclusion***
